

Funder	Project Title	Funding	Strategic Plan Objective	Institution
Autism Speaks	Genetic and epigenetic interactions in a mouse model for autism	\$60,000	Q3.Other	David Geffen School of Medicine at University of California, Los Angeles
Autism Speaks	Collaborative neuropathology workgroup: A comprehensive multilevel analysis of frontal lobe microstructure in autism	\$166,000	Q2.5	University of California, San Diego
National Institutes of Health	Evaluation of diagnostic and services practices in autism	\$167,723	Q1.Other	University of California, San Diego
National Institutes of Health	fMRI studies of neural dysfunction in autistic toddlers	\$604,727	Q2.Other	University of California, San Diego
Centers for Disease Control and Prevention	Early ASD surveillance - 1	\$349,980	Q3.9	California Department of Health
Autism Speaks	Mitochondria and autism	\$690,460	Q1.3	University of California, Irvine; University of California, San Diego
National Institutes of Health	Genetics and physiology of social anxiety in fragile X	\$157,300	Q2.Other	University of California, Davis
National Institutes of Health	Translating autism intervention for mental health services via knowledge exchange	\$165,745	Q5.Other	University of California, San Diego
National Institutes of Health	Biomedical informatics research network: National Database for Autism Research	\$160,000	Q2.Other	University of California, San Diego
National Institutes of Health	Social and affective components of communication	\$316,589	Q2.Other	Salk Institute For Biological Studies
Simons Foundation	Testing neurological models of autism	\$315,526	Q2.Other	California Institute of Technology
National Institutes of Health	Anatomy of primate amygdaloid complex	\$81,333	Q3.Other	University of California, Davis
National Institutes of Health	Epigenetic interaction of MECP2 and organic pollutants in neurodevelopment	\$424,863	Q3.Other	University of California, Davis
National Institutes of Health	Mirror neuron and reward circuitry in autism	\$315,592	Q2.Other	University of California, Los Angeles
National Institutes of Health	L-type Ca ²⁺ channel regulation of dendritic arborization	\$32,845	Q2.Other	Stanford University
National Institutes of Health	Development of face processing expertise in children	\$238,263	Q1.Other	University of California, San Diego
National Institutes of Health	Structural brain differences between autistic and typically-developing siblings	\$2,802	Q2.Other	Stanford University
National Institutes of Health	Language and social communication in autism - 1	\$2,576	Q3.Other	University of California, Los Angeles
National Institutes of Health	Autism in adolescents	\$2,576	Q3.Other	University of California, Los Angeles
National Institutes of Health	Cerebral asymmetry and language in autism	\$2,576	Q3.Other	University of California, Los Angeles
National Institutes of Health	Neuroimaging of autism spectrum disorders	\$2,576	Q3.Other	University of California, Los Angeles
National Institutes of Health	Language and social communication in autism - 2	\$5,153	Q3.Other	University of California, Los Angeles
National Institutes of Health	Pharmacogenomics in autism treatment	\$171,000	Q4.Other	University of California, Davis
Center for Autism and Related Disorders	Teaching children to comprehend rules containing "if/then"	\$38,994	Q4.Other	Center for Autism and Related Disorders
Center for Autism and Related Disorders	Teaching children to identify causes of others' emotions	\$20,687	Q4.Other	Center for Autism and Related Disorders

Funder	Project Title	Funding	Strategic Plan Objective	Institution
Center for Autism and Related Disorders	Teaching theory of mind skills to children with ASD	\$24,025	Q4.Other	Center for Autism and Related Disorders
Center for Autism and Related Disorders	Psychometric evaluation of the QABF in children with ASD	\$11,069	Q1.Other	Center for Autism and Related Disorders
Department of Defense	Interaction between MEF2 and MECP2 in the pathogenesis of autism spectrum disorders -2	\$262,845	Q3.Other	Burnham Institute
Department of Defense	Interaction between MEF2 and MECP2 in the pathogenesis of autism spectrum disorders - 1	\$262,845	Q3.Other	Burnham Institute
Department of Defense	Microglia as biosensors and effectors of neurodysfunction	\$105,716	Q3.Other	University of California, Riverside
Department of Education	Translating pivotal response training into classroom environments	\$473,411	Q4.Other	Rady Children's Hospital Health Center
National Institutes of Health	Core C: Analytical core	\$97,604	Q3.3	University of California, Davis
National Institutes of Health	Project 1: Environmental epidemiology of autism	\$181,428	Q3.6	University of California, Davis
Autism Speaks	Etiology of autism risk involving MET gene and the environment	\$220,000	Q3.8	University of California, Davis
Simons Foundation	Testing the effects of cortical disconnection in non-human primates	\$150,000	Q4.5	Salk Institute for Biological Studies
National Institutes of Health	Analysis of 15q11-13 GABA-A receptor defects in autism	\$30,772	Q4.5	University of California, Davis
National Institutes of Health	Role of L-type calcium channels in hippocampal neuronal network activity	\$34,686	Q4.5	Stanford University
National Institutes of Health	Analysis of FGF17 roles and regulation in mammalian forebrain development	\$51,886	Q4.5	University of California, San Francisco
Simons Foundation	A non-human primate autism model based on maternal infection	\$446,873	Q4.5	California Institute of Technology
Simons Foundation	Role of Wnt signaling through Dishevelled, Dact and p120catenin in forebrain development, synaptic physiology, and mouse behavior: Exploration of a pathway with many components linked to autism spectrum disorders	\$210,122	Q4.5	University of California, San Francisco
Simons Foundation	Function and dysfunction of neuroligins	\$498,665	Q4.5	Stanford University
Simons Foundation	Probing a monogenic form of autism from molecules to behavior	\$187,500	Q4.5	Stanford University
Autism Speaks	Safety and efficacy of complementary and alternative medicine for autism spectrum disorders	\$100,000	Q4.6	University of California, San Francisco
National Institutes of Health	Optimizing social and communication outcomes for toddlers with autism	\$290,094	Q4.3	University of California, Los Angeles

Funder	Project Title	Funding	Strategic Plan Objective	Institution
National Institutes of Health	A multi-site randomized study of intensive treatment for toddlers with autism	\$2,971,125	Q4.3	University of California, Davis
Autism Speaks	Joint attention intervention for caregivers and their children with autism	\$51,000	Q4.4	University of California, Los Angeles
National Institutes of Health	The Charge Study: Childhood autism risks from genetics and the environment	\$1,014,318	Q3.4	University of California, Davis
National Institutes of Health	Neurogenomics in a model for procedural learning	\$30,774	Q3.8	University of California, Los Angeles
National Institutes of Health	Hindbrain dysgenesis in Rett syndrome and other autism spectrum disorders	\$24,823	Q3.8	University of California, Davis
National Institutes of Health	Patient-oriented research in recessive pediatric brain diseases	\$172,234	Q3.8	University of California, San Diego
Autism Speaks	Molecular and environmental influences on autism pathophysiology	\$150,000	Q3.1	University of California, Los Angeles
Autism Speaks	Vitamin D status and autism spectrum disorder: Is there an association?	\$80,000	Q3.1	University of California, Davis
Centers for Disease Control and Prevention	Centers for autism and developmental disabilities research and epidemiology - 1	\$908,540	Q3.1	Kaiser Foundation Research Institute
National Institutes of Health	The Charge Study: Childhood autism risks from genetics and the environment - Supplemental	\$100,000	Q3.4	University of California, Davis
National Institutes of Health	A comprehensive approach to identification of autism susceptibility genes	\$3,031,776	Q3.4	University of California, Los Angeles
Center for Autism and Related Disorders	Comparison of high to low intensity behavioral intervention	\$121,029	Q4.7	Center for Autism and Related Disorders
Autism Speaks	Double-blind placebo controlled trial of subcutaneous methyl B12 on behavioral and metabolic measures in children with autism	\$150,000	Q4.8	University of California, Davis
Autism Speaks	Integrated play groups: Promoting social communication and symbolic play with peers across settings in children with autism	\$150,000	Q4.4	San Francisco State University
Autism Speaks	Robotics and speech processing technology for the facilitation of social communication training in children with autism	\$100,000	Q4.4	University of Southern California
National Institutes of Health	Neocortical regionalization: Analysis of genetic and epigenetic influences	\$75,000	Q4.5	University of California, Riverside
National Institutes of Health	A non-human primate autism model based on maternal immune activation	\$81,333	Q3.1	University of California, Davis
National Institutes of Health	MRI studies of early brain development in autism	\$362,075	Q1.3	University of California, San Diego
Center for Autism and Related Disorders	Presence of clostridia in children with and without ASD	\$12,054	Q2.Other	Center for Autism and Related Disorders

Funder	Project Title	Funding	Strategic Plan Objective	Institution
Center for Autism and Related Disorders	Teaching children to identify others' preferences	\$22,058	Q4.Other	Center for Autism and Related Disorders
Center for Autism and Related Disorders	Establishing liquid medication administration compliance	\$27,985	Q4.Other	Center for Autism and Related Disorders
Center for Autism and Related Disorders	Identifying factors that predict response to intervention	\$21,965	Q4.Other	Center for Autism and Related Disorders
Autism Speaks	Investigation of cortical folding complexity in children with autism, their autism-discordant siblings, and controls	\$100,000	Q2.5	Stanford University
National Institutes of Health	Project 2: Immunological susceptibility of autism	\$136,641	Q2.2	University of California, Davis
National Institutes of Health	Cortical complexity in children with autism unaffected siblings and controls	\$79,000	Q2.Other	Stanford University
National Institutes of Health	International Meeting for Autism Research (IMFAR) - NICHD	\$48,550	Other	University of California, Davis
National Institutes of Health	Neuroimaging & symptom domains in autism	\$5,153	Q3.Other	University of California, Los Angeles
National Institutes of Health	The imaging core	\$318,616	Q2.Other	University of California, Los Angeles
National Institutes of Health	Genetics of language & social communication: Connecting genes to brain & cognition	\$326,310	Q2.Other	University of California, Los Angeles
National Institutes of Health	The diagnostic and assessment core	\$300,158	Q1.Other	University of California, Los Angeles
Center for Autism and Related Disorders	Age and treatment intensity in behavioral intervention	\$34,879	Q4.Other	Center for Autism and Related Disorders
National Institutes of Health	The development of the siblings of children with autism: A longitudinal study	\$353,056	Q1.Other	University of California, Los Angeles
National Institutes of Health	Administrative core - 1	\$34,123	Other	University of California, San Diego
National Institutes of Health	Imaging autism biomarkers + risk genes	\$198,473	Q3.Other	University of California, San Diego
National Institutes of Health	Clinical phenotype: Recruitment and assesment core	\$415,472	Q1.Other	University of California, San Diego
National Institutes of Health	Imaging the autistic brain before it knows it has autism	\$222,866	Q2.Other	University of California, San Diego
National Institutes of Health	Development of neural pathways in infants at risk for autism spectrum disorders	\$328,313	Q2.Other	University of California, San Diego
National Institutes of Health	Clinical phenotype: Treatment response core	\$199,980	Q4.Other	University of California, San Diego
National Institutes of Health	Targeting genetic pathways for brain overgrowth in autism spectrum disorders	\$289,513	Q3.Other	University of California, San Diego
National Institutes of Health	Visual processing and later cognitive effects in infants with fragile X syndrome	\$249,958	Q1.Other	University of California, Davis
National Institutes of Health	The role of the amygdala in autism	\$149,268	Q2.Other	University of California, Davis
National Institutes of Health	Cognitive control in autism	\$144,251	Q2.Other	University of California, Davis

Funder	Project Title	Funding	Strategic Plan Objective	Institution
National Institutes of Health	Interdisciplinary training for autism researchers (RMI)	\$213,613	Other	University of California, Davis
Autism Research Institute	Epstein-Barr virus research	\$30,000	Q2.Other	Pediatric Gastrointestinal Association
Autism Speaks	Immune molecules and cortical synaptogenesis: Possible implications for the pathogenesis of autism	\$150,000	Q2.Other	University of California, Davis
National Institutes of Health	Integrated Biostatistical and Bioinformatic Analysis Core (IBBAC)	\$194,512	Q1.3	University of California, San Diego
Autism Speaks	Neuroligins and neuroligins as autism candidate genes: Study of their association in synaptic connectivity	\$60,000	Q2.Other	University of California, San Diego
Autism Speaks	Maternal infection and autism: Impact of placental sufficiency and maternal inflammatory responses on fetal brain development	\$130,000	Q2.Other	Stanford University
Autism Speaks	Roles of Wnt signaling/scaffolding molecules in autism	\$28,000	Q2.Other	University of California, San Francisco
Autism Speaks	The role of the autism-associated gene Tuberous Sclerosis Complex 2 (TSC2) in presynaptic development	\$55,000	Q2.Other	University of California, San Diego
Simons Foundation	Neuronal populations related to deficits in social emotions and cognition in autism: A neurobiological and genomics approach	\$62,500	Q3.8	California Institute of Technology
Simons Foundation	Demonstration of the novel RASL/DASL method for analysis of gene expression in frontal cortex in autism and control cases	\$62,103	Q3.8	University of California, San Diego
Autism Speaks	Pilot project to assess web-based family recruitment for autism genetics studies	\$998,654	Q1.Other	University of California, Los Angeles; Washington University in St. Louis; Kennedy Krieger Institute
Center for Autism and Related Disorders	Evaluation of behavior problems in children with ASD	\$30,025	Q1.Other	Center for Autism and Related Disorders
Center for Autism and Related Disorders	Psychometric evaluation of the autism symptom diagnostic scale	\$8,975	Q1.Other	Center for Autism and Related Disorders
Center for Autism and Related Disorders	Psychometric evaluation of the behavior problems inventory in ASD	\$25,032	Q1.Other	Center for Autism and Related Disorders
Center for Autism and Related Disorders	Description and assessment of sensory abnormalities in ASD	\$18,968	Q2.Other	Center for Autism and Related Disorders
Center for Autism and Related Disorders	Evaluation of sleep disturbance in children with ASD	\$27,456	Q2.Other	Center for Autism and Related Disorders
Autism Speaks	Attentional abnormalities in autism: An electrophysiological study of the basal forebrain and central nucleus of the amygdala	\$60,000	Q2.Other	University of California, San Diego

Funder	Project Title	Funding	Strategic Plan Objective	Institution
Autism Speaks	A combined fMRI-TMS study on the role of the mirror neuron system in social cognition: Moving beyond correlational evidence	\$150,000	Q2.Other	University of California, Los Angeles
National Institutes of Health	Center for genomic and phenomic studies in autism	\$1,579,282	Q3.8	University of Southern California
National Institutes of Health	Using induced pluripotent stem cells to identify cellular phenotypes of autism	\$800,000	Q1.5	Stanford University
Autism Speaks	Is autism a mitochondrial disease?	\$60,000	Q2.2	University of California, Davis
National Institutes of Health	Maternal inflammation alters fetal brain development via Tumor Necrosis Factor-alpha	\$49,646	Q2.2	Stanford University
National Institutes of Health	Genetics of autistic disorder	\$916	Q2.2	University of California, San Diego
National Institutes of Health	The role of MECP2 in Rett syndrome - Supplement	\$47,769	Q3.8	University of California, Davis
National Institutes of Health	Epigenetic etiologies of autism spectrum disorders	\$344,947	Q3.8	University of California, Davis
National Institutes of Health	A California population-based twin study of autism	\$516,910	Q3.8	Stanford University
Autism Speaks	Technology support for interactive and collaborative visual schedules	\$42,000	Q4.Other	University of California, Irvine
Autism Speaks	Early biologic markers for autism	\$60,000	Q3.Other	Kaiser Foundation Research Institute
Center for Autism and Related Disorders	Long-term follow-up of children with autism who recovered	\$33,965	Q4.Other	Center for Autism and Related Disorders
Autism Speaks	Neural basis of socially driven attention in children with autism	\$28,000	Q2.5	University of California, Los Angeles
National Institutes of Health	Studying the biology and behavior of autism at 1-year: The well-baby check-up appointment	\$237,015	Q2.Other	University of California, San Diego
National Institutes of Health	Towards an endophenotype for amygdala dysfunction	\$414,395	Q2.Other	California Institute of Technology
National Institutes of Health	Project 3: Neurodevelopmental toxicology of autism	\$136,640	Q3.Other	University of California, Davis
National Institutes of Health	Core D: Molecular genomics core	\$57,849	Q3.Other	University of California, Davis
Center for Autism and Related Disorders	Double blind placebo controlled evaluation of fluconazole	\$15,134	Q4.6	Center for Autism and Related Disorders
Center for Autism and Related Disorders	Preventing autism via very early detection and intervention	\$14,256	Q4.9	Center for Autism and Related Disorders
Center for Autism and Related Disorders	Parent mediated behavioral treatment of food selectivity	\$30,966	Q4.Other	Center for Autism and Related Disorders
Autism Speaks	Translation of evidenced based treatment to classrooms	\$30,000	Q4.4	University of California, San Diego

Funder	Project Title	Funding	Strategic Plan Objective	Institution
Simons Foundation	Oxytocin biology and the social deficits of autism spectrum disorders	\$112,500	Q1.3	Stanford University
Simons Foundation	A system biology approach to autism genetics	\$75,624	Q3.8	University of California, Los Angeles
Center for Autism and Related Disorders	Chart review of 38 cases of recovery from autism	\$35,117	Q4.Other	Center for Autism and Related Disorders
Autism Speaks	Intervention for infants at risk for autism	\$150,000	Q4.3	University of California, Davis
Autism Speaks	Role of micro-RNAs in ASD affected circuit formation and function	\$150,000	Q3.8	University of California, San Francisco
Center for Autism and Related Disorders	Double blind placebo controlled trial of hyperbaric oxygen	\$60,021	Q4.6	Center for Autism and Related Disorders
National Institutes of Health	Magnetic source imaging and sensory behavioral characterization in autism	\$166,302	Q2.Other	University of California, San Francisco
National Institutes of Health	Core E: Statistical analysis core	\$15,624	Q3.Other	University of California, Davis
National Institutes of Health	Core B: Outreach and translation	\$85,017	Q2.Other	University of California, Davis
Simons Foundation	Simons Simplex Collection Site - 6	\$393,989	Q3.8	University of California, Los Angeles
Autism Speaks	Developmental and augmented intervention for facilitating expressive language	\$600,000	Q4.3	University of California, Los Angeles
National Institutes of Health	Primate models of autism	\$727,322	Q2.2	University of California, Davis
Health Resources and Services Administration	Autism Intervention Research network on Behavioral health (AIR-B network)	\$2,000,000	Q4.Other	University of California, Los Angeles
Autism Speaks	Stereological analyses of neuron numbers in frontal cortex from age 3 years to adulthood in autism	\$150,000	Q2.5	University of California, San Diego
National Institutes of Health	Neurologin and autism	\$9,756	Q3.8	University of California, San Diego
National Institutes of Health	Genotype-phenotype relationships in fragile X families	\$533,062	Q3.8	University of California, Davis
