

Funder	Project Title	Funding	Institution
Autism Speaks	Mitochondria and autism	\$690,460	University of California, Irvine; University of California, San Diego
Autism Speaks	The genetic link between autism and structural cerebellar malformations	\$32,000	University of Chicago
Autism Speaks	Identifying gastrointestinal (GI) conditions in children with autism spectrum disorders (ASD)	\$150,000	Harvard Medical School
Autism Speaks	Neurophysiological indices of risk and outcome in autism	\$61,000	University of Washington
Autism Speaks	Clinical and gene signatures of ASDs	\$61,000	University of British Columbia
Department of Defense	Mitochondrial defects in autism	\$94,500	Georgia State University
National Institutes of Health	Metabolic biomarkers of autism: Predictive potential and genetic susceptibility	\$369,495	Arkansas Children's Hospital Research Institute
National Institutes of Health	MRI studies of early brain development in autism	\$362,075	University of California, San Diego
National Institutes of Health	Integrated Biostatistical and Bioinformatic Analysis Core (IBBAC)	\$194,512	University of California, San Diego
National Institutes of Health	Linguistic and social responses to speech in infants at risk for autism	\$308,398	University of Washington
Southwest Autism Research & Resource Center	Family study of autism: Genomic and proteomic markers	\$150,000	Southwest Autism Research & Resource Center
Simons Foundation	Oxytocin biology and the social deficits of autism spectrum disorders	\$112,500	Stanford University
Simons Foundation	Signatures of gene expression in ASD	\$150,000	Boston Children's Hospital
Simons Foundation	Mis-regulation of BDNF in autism spectrum disorders	\$150,000	Weill Cornell Medical College
