

Funder	Project Title	Funding	Institution
Autism Research Institute	Brain region specific oxidative stress	\$25,575	Brigham and Women's Hospital
Autism Research Institute	Impact of innate immunity on regressive autism	\$110,000	University of Medicine & Dentistry of New Jersey
Autism Research Institute	Markers of inflammation and oxidative damage	\$50,000	Research Foundation for Mental Hygiene, Inc.
Autism Research Institute	Neuronal oxidative stress in autism	\$37,500	Case Western Reserve University
Autism Speaks	Is autism a mitochondrial disease?	\$60,000	University of California, Davis
Autism Speaks	Influence of oxidative stress on transcription and alternative splicing of methionine synthase in autism	\$28,000	Northeastern University
Autism Speaks	Deriving neuroprogenitor cells from peripheral blood of individuals with autism	\$60,000	University of Utah
National Institutes of Health	Project 2: Immunological susceptibility of autism	\$136,641	University of California, Davis
National Institutes of Health	Maternal inflammation alters fetal brain development via Tumor Necrosis Factor-alpha	\$49,646	Stanford University
National Institutes of Health	Primate models of autism	\$727,322	University of California, Davis
National Institutes of Health	Genetics of autistic disorder	\$916	University of California, San Diego
National Institutes of Health	Autism: Role of oxytocin	\$27,862	University of Kansas Medical Center
National Institutes of Health	Psychosis and autoimmune diseases in Denmark	\$184,218	Johns Hopkins University
National Institutes of Health	Studies of central nervous system functional anatomy	\$1,048,141	National Institutes of Health
National Institutes of Health	Neuroimmunologic investigations of autism spectrum disorders (ASD)	\$512,425	National Institutes of Health
National Institutes of Health	Fraternal birth order effects on behavior	\$205,200	Michigan State University
National Institutes of Health	Evaluation and treatment of copper/zinc imbalance in children with autism	\$1,622	Penn State Milton S. Hershey Medical Center
Simons Foundation	Regulation of inflammatory TH17 cells in ASD	\$112,500	New York University School of Medicine
