

Funder	Project Title	Funding	Institution
Autism Speaks	Electrophysiologic biomarkers of language function in autism spectrum disorders	\$28,600	University of California, Los Angeles
Autism Speaks	Using fMRI to understand the Neural Mechanisms of Pivotal Response Treatment	\$29,500	University of California, Santa Barbara
Autism Speaks	Imaging-based real-time feedback to enhance therapeutic intervention in ASD	\$59,825	Stanford University
Autism Speaks	Near-infrared spectroscopy studies of early neural signatures of autism	\$149,977	Yale University
Autism Speaks	Autism Biomarker Discovery Program	\$1,999,984	Seaside Therapeutics
Autism Speaks	Neural Correlates of Imitation in Children with Autism and their Unaffected Siblings	\$28,600	Harvard University
Autism Speaks	In-vivo MRS assay of brain glutamate-GABA balance and drug response in autism	\$58,561	King's College London
National Institutes of Health	ACE Center: Predicting risk and resilience in ASD through social visual engagement	\$226,068	Emory University
National Institutes of Health	Quantifiable markers of ASD via multivariate MEG-DTI combination	\$257,169	University of Pennsylvania
Simons Foundation	Local functional connectivity in the brains of people with autism	\$108,297	Massachusetts General Hospital
Simons Foundation	The Brain Genomics Superstruct Project	\$150,000	Harvard University
Simons Foundation	Reliability of Sensory-Evoked Activity in Autism Spectrum Disorders- Project 1	\$0	Carnegie Mellon University
Simons Foundation	A study of autism	\$0	University of Pennsylvania
