

Funder	Project Title	Funding	Institution
Department of Defense - Autism Research Program	Neural correlates of restricted, repetitive behaviors in autism spectrum disorders	\$0	Massachusetts General Hospital
Department of Defense - Autism Research Program	Neural correlates of restricted, repetitive behaviors in autism spectrum disorders	\$0	Massachusetts General Hospital
Department of Defense - Air Force	A collaborative translational autism research program for the military.	\$903,888	Nationwide Children's Hospital
Autism Speaks	Factors influencing early associative learning as a precursor to social behavior heterogeneity	\$53,000	University of Southern California
Autism Speaks	Social cognition in 22q11.2 deletion syndrom (DS) adolescents with ASD vs. without ASD: Imaging and genetic correlates	\$0	State University of New York Upstate Medical Center
Autism Speaks	Social processing, language, and executive functioning in twin pairs: Electrophysiological and behavioral endophenotypes	\$150,000	University of Washington
National Institutes of Health	ACE Center: Neuroimaging signatures of autism: Linking brain function to genes and behavior	\$191,823	University of California, Los Angeles
National Institutes of Health	ACE Center: Genetic and genomic analyses to connect genes to brain to cognition in ASD	\$252,243	University of California, Los Angeles
National Institutes of Health	A neuroimaging study of twin pairs with autism	\$625,557	Stanford University
National Institutes of Health	Genomic and epigenomic effects of large CNV in neurons from iPSC	\$2,355,000	Stanford University
National Institutes of Health	Autism: Neuropeptide hormones and potential pathway genes	\$185,338	University of Illinois at Urbana Champaign
National Institutes of Health	A family-genetic study of language in autism	\$391,295	Northwestern University
National Institutes of Health	Characterizing the genetic systems of autism through multi-disease analysis (supplement)	\$120,328	Harvard Medical School
National Institutes of Health	Characterizing the genetic systems of autism through multi-disease analysis	\$524,280	Harvard Medical School
National Institutes of Health	Autistic traits: Life course & genetic structure	\$531,127	Washington University in St. Louis
National Institutes of Health	Genome-wide identification of variants affecting early human brain development	\$611,005	University of North Carolina at Chapel Hill
National Institutes of Health	Animal model of genetics and social behavior in autism spectrum disorders	\$791,070	Duke University
National Institutes of Health	Functional imaging of flexibility in autism: Informed by SLC6A4	\$132,748	Children's Hospital of Philadelphia
National Institutes of Health	High throughput sequencing of autism spectrum disorder (ASD) endophenotypes	\$39,432	Baylor College of Medicine
National Institutes of Health	Genetic dissection of restricted repetitive behavior (RRB)	\$177,736	Seattle Children's Hospital
National Institutes of Health	The genetic basis of mid-hindbrain malformations	\$798,866	Seattle Children's Hospital
Simons Foundation	Simons Variation in Individuals Project (VIP) Functional Imaging Site	\$1,299,083	University of California, San Francisco
Simons Foundation	Simons Variation in Individuals Project (VIP) Core Neuroimaging Support Site	\$513,646	University of California, San Francisco

Funder	Project Title	Funding	Institution
Simons Foundation	Simons Variation in Individuals Project (Simons VIP) Core Leader Gift	\$0	University of California, San Francisco
Simons Foundation	Relating copy number variants to head and brain size in neuropsychiatric disorders	\$322,286	University of California, San Diego
Simons Foundation	Developmental neurogenetics in adolescents with autism	\$124,769	Yale University
Simons Foundation	Genetic investigations of motor stereotypies	\$62,136	Yale University
Simons Foundation	Simons Variation in Individuals Project (Simons VIP)	\$706,044	Emory University
Simons Foundation	Language processing in children with 22q11 deletion syndrome and autism	\$0	Emory University
Simons Foundation	Identifying the gene in 17q12 responsible for neuropsychiatric phenotypes	\$180,140	Emory University
Simons Foundation	Children with 7q11.23 duplication syndrome: shared characteristics with autism	\$125,000	University of Louisville
Simons Foundation	Simons Variation in Individual Project (Simons VIP) Core Leader Gift	\$0	Boston Children's Hospital
Simons Foundation	Simons Variation in Individuals Project (VIP) Site	\$768,296	Boston Children's Hospital
Simons Foundation	Simons Variation in Individuals Project (VIP) Imaging Analysis Site	\$137,106	Harvard University
Simons Foundation	Characterization of infants and toddlers with the 16p copy-number variation	\$190,766	Boston Children's Hospital
Simons Foundation	Simons Variation in Individuals Project (VIP) Principal Investigator	\$126,453	Columbia University
Simons Foundation	Simons Variation in Individuals Project (Simons VIP) Principal Investigator Gift	\$73,534	Columbia University
Simons Foundation	Simons Variation in Individuals Project (VIP) Statistical Core Site	\$136,125	Columbia University
Simons Foundation	Comprehensive phenotypic characterization of the 17q12 deletion syndrome	\$62,500	Weis Center for Research - Geisinger Clinc
Simons Foundation	Simons Variation in Individuals Project (VIP) Structural Imaging and Phenotyping Site - SCAP-local	\$217,322	The Children's Hospital of Philadelphia
Simons Foundation	Simons Variation in Individuals Project (VIP) Functional Imaging Site	\$736,449	The Children's Hospital of Philadelphia
Simons Foundation	Simons Variation in Individuals Project (VIP) Recruitment Coordination Site	\$98,087	Weis Center for Research - Geisinger Clinc
Simons Foundation	Simons Variation in Individuals Project (VIP) Site	\$466,763	Baylor College of Medicine
Simons Foundation	Simons Variation in Individuals Project (VIP) Site	\$436,833	University of Washington
