

| Funder                        | Project Title  | Funding   | Institution   |
|-------------------------------|--|-----------|---|
| Autism Speaks                 | Genome-wide expression profiling data analysis to study autism genetic models  | \$28,000  | University of California, Los Angeles                     |
| Autism Speaks                 | Advanced parental age and autism: The role of aneuploidy and uniparental disomy in ASD pathogenesis                                | \$28,000  | Albert Einstein College of Medicine of Yeshiva University |
| Autism Speaks                 | Genomic influences on developmental course and outcome in Infants at risk of ASD: A Baby Siblings Research Consortium (BSRC) Study | \$0       | University of Alberta                                     |
| Autism Speaks                 | Genomic influences on development and outcomes in Infants at risk of ASD   | \$337,779 | University of Alberta                                     |
| National Institutes of Health | Rapid phenotyping for rare variant discovery in autism   | \$645,169 | University of California, Los Angeles                     |
| National Institutes of Health | Finding autism genes by genomic copy number analysis   | \$577,035 | Boston Children's Hospital                                |
| National Institutes of Health | Isolation of autism susceptibility genes   | \$591,231 | deCODE Genetics, ehf.                                     |
