

Funder	Project Title	Funding	Institution
Brain & Behavior Research Foundation	Exploration of resting-state network dynamics in autism spectrum disorders	\$30,000	Harvard University
Brain & Behavior Research Foundation	Whole Brain Mapping of the Effects of Intranasal Oxytocin in CNTNAP2 KO Mouse Model of Autism	\$0	Cold Spring Harbor Laboratory
Autism Science Foundation	Effects of active motor & social training on developmental trajectories in infants at high risk for ASD	\$0	Kennedy Krieger Institute
Autism Speaks	Training Community Providers to Implement an Evidence-Based Early Intervention Program	\$149,569	University of California, Davis
Autism Speaks	A non-interactive method for teaching noun and verb meanings to young children with ASD	\$58,900	Boston University
Autism Speaks	Hybrid social communication intervention for children with ASD: Sibling mediation and video modeling	\$59,997	Portland State University
Autism Speaks	The BUFFET Program: Building Up Food Flexibility and Exposure Treatment	\$53,104	Children's Hospital of Philadelphia
Autism Speaks	CIHR Chair: Autism Spectrum Disorders Treatment and Care Research	\$15,000	York University
Department of Education	Phase 2: Animated Visual Support for Social Support (AVISSS); An interactive virtual experience for social skill development	\$0	University Of Kansas Center For Research, Inc. -- Sped - Special Education Educ Education Administration - Sped - Special Education Educ Education Administration
Department of Education	Using robotics to promote social cognitive skills in the inclusive classroom	\$0	Anthrotronix, Inc.
Department of Education	Virtual Environment for Social Information Processing (VESIP) Phase II	\$0	Soar Technology, Inc..
Department of Education	Utility of social robots for promoting joint attention in infants and toddlers with disabilities	\$0	Orelena Hawks Puckett Institute
National Institutes of Health	Treatment of Autism Symptoms in Children (TASC): Initial RCT with active control	\$369,600	University of California, Los Angeles
National Institutes of Health	Wireless EEG system for training attention and eye movement in ASD	\$214,722	University of California, San Diego
National Institutes of Health	Fast-as -new experimental medicine studies: Fast-fail trials in autism spectrum	\$2,312,083	University of California, Los Angeles
National Institutes of Health	Atypical effects of reinforcement procedures in ASD	\$250,000	University of Massachusetts Medical School
National Institutes of Health	Neuroactive steroid GABAA receptor positive modulators for fragile X syndrome	\$162,500	Sage Therapeutics, Inc.
National Institutes of Health	Assessing interactive avatars for use with children with autism	\$72,883	Carnegie Mellon University
National Institutes of Health	Adapting cognitive enhancement therapy for ASD	\$211,536	University of Pittsburgh
National Institutes of Health	Adaptive response technology for autism spectrum disorders intervention	\$359,376	Vanderbilt University Medical Center
National Institutes of Health	Peers, play and performance to improve social interaction in autism	\$234,000	Vanderbilt University Medical Center
Organization for Autism Research	Increasing variability of verbal initiations through the responses of conversation patterns	\$2,449	Texas Christian University
Simons Foundation	Prosodic and pragmatic training in highly verbal children with autism	\$200,000	Harvard University

Funder	Project Title	Funding	Institution
Simons Foundation	Home-based system for biobehavioral recording of individuals with autism	\$353,250	Northeastern University
Simons Foundation	Exploring links between multisensory and cognitive function in autism	\$60,000	Vanderbilt University
Agency for Healthcare Research and Quality	EPC Systematic Review: Autism Spectrum Disorders - Update	\$225,000	Vanderbilt EPC
National Science Foundation	HCC-Medium: Personalized socially-assistive human-robot interaction: Applications to autism spectrum disorder	\$8,000	University of Southern California
National Science Foundation	SBIR Phase I: A consumer robot designed to help children with autism spectrum disorders practice critical social skills	\$0	Interbots LLC
National Science Foundation	Individualized Adaptive Robot-Mediated Intervention Architecture for Autism	\$312,753	Vanderbilt University
National Science Foundation	A novel adaptive transactional virtual reality-based assistive technology for autism intervention	\$0	Vanderbilt University
